

Radiographic History of the CPSU in the period 1950 - 1990

By Shomit Sirohi

- I. French conjuncture in Fordism, as bureauacratished mass factories with Hungarian Crisis intertwined with Cuba and FLN in Algeria alongside China and Indian Communism by the 1990s

In large unions the problem remains that of specialists, or permanent category workers, and even backward workers who then in the specific format of concrete analysis become contingent dispersed groups and this is the problem of Fordism also being a bureaucratic union mass strike.

With history becoming a totalisation - each period in CPSU, has to be studied in line with Mao's Cultural Revolution for the student process of mass democracy and direct class confrontation lines, while the CPSU and PCF and even PCE and PCI, and PCA with the late entry of CPIML and then CPIM finally in intertwined radical insurrectional force of mobilizing the non-bureaucratic form of unions - syndicalism, with noyeaux and mass unions even trade unions all in in fact totalisation of each ensemble towards general mass strike - and then of course the CPSU reporting on the need for tactics and strategy as pamphlets and newspapers all of which became the Hungarian crisis and even Czech Republic crisis and of course mass line after mass line finally by Sirohi in the 1999 period to in fact his dismissal by America as a youth perspective for his final clinching of the CPSU and all Parties line in in fact now 2020s and his isolated life lecturing into hegemony as in fact the form of again a new Communist wave he reports as 50,000 dispersed protests in European countries because of the hegemony form which attacked again the far right.

- II. FLN and Cuba with the Authenticity of old lines for China

As of course the question is resolved in India of the whole modernist paradise of capital and state commerce, the question remains for Cuba and FLN in Algeria to in fact modernize in the direction of mass participation of some type of union for in fact political dynamics of democracy after architecture - this is the problem of rejecting Sirohi - that in fact the Brumiare will be a bourgeois Brumiare and that is all, because the proletariat is in fact then in Brumiares and such unethical culture - totalised as protest models for Spain and all countries which is a mass line from all parties and is following aleatory small protests which becomes the current tragedy of the spectre of Communism.
